-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 July 2007.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Applicant's election of the species of Fig. 5 in the reply filed on 7/27/2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim 3 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/27/2007.

Claim 3 was incorrectly identified as fully generic in the restriction requirement mailed 6/22/2007.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Nomura et al.

Nomura et al. teach the provision of a thermal storage layer in a fuel tank structure in aviation applications (see the abstracts from Derwent and the

Japanese Database). Thus, each element recited in claim 2 is found in Nomura et al.

As to claim 1, the recited “suppressing”, “radiating”, and “whereby” clauses of this claim merely recite the inherent properties or characteristics that the thermal storage material in the tank structure of Nomura et al. will exhibit when fuel of varying temperatures is exposed to external temperatures that are either warmer or cooler than the fuel.

Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Collins et al. teaches the placement of a thermal blanket containing a thermal storage material on various components such as a “fuel cell” (tank) of a race car to cool the fuel. Kido et al. similarly provide an air filled space surrounding a fuel tank to act as a thermal sink to which heat from a fuel tank can be rejected by fins extending into the airspace. Thompson uses thermal storage material to cool fuel in a filler neck. The remaining references show fuel tank designs, with or without heat exchange means.
